Top Mount Tank: 500 Gallon Aluminum
Height: 9 ft 8 inches
GVW 35,180 lbs

Body Refurb and Paint 1999, Purchased from Custom Tec Apparatus IL, USA

The body and chassis of this pumper truck is in good shape, which speaks to the dedication of our members for the past 19 years. In summer 2015, this was one of our community's support to the La Ronge Fire and it performed. Aside from that, since 2014 it has seen limited action but has been stored indoors since it came to Carrot River in 1999.

*Pump tested annually, Did NOT pass Pump Test by Fort Garry in summer 2018

We are taking offers for the truck as is. To view or discuss further, please call Chief Bryce Lytle at (306) 768-3331 or on cell (780) 581-7806 or email firechief.carrotriver@sasktel.net
